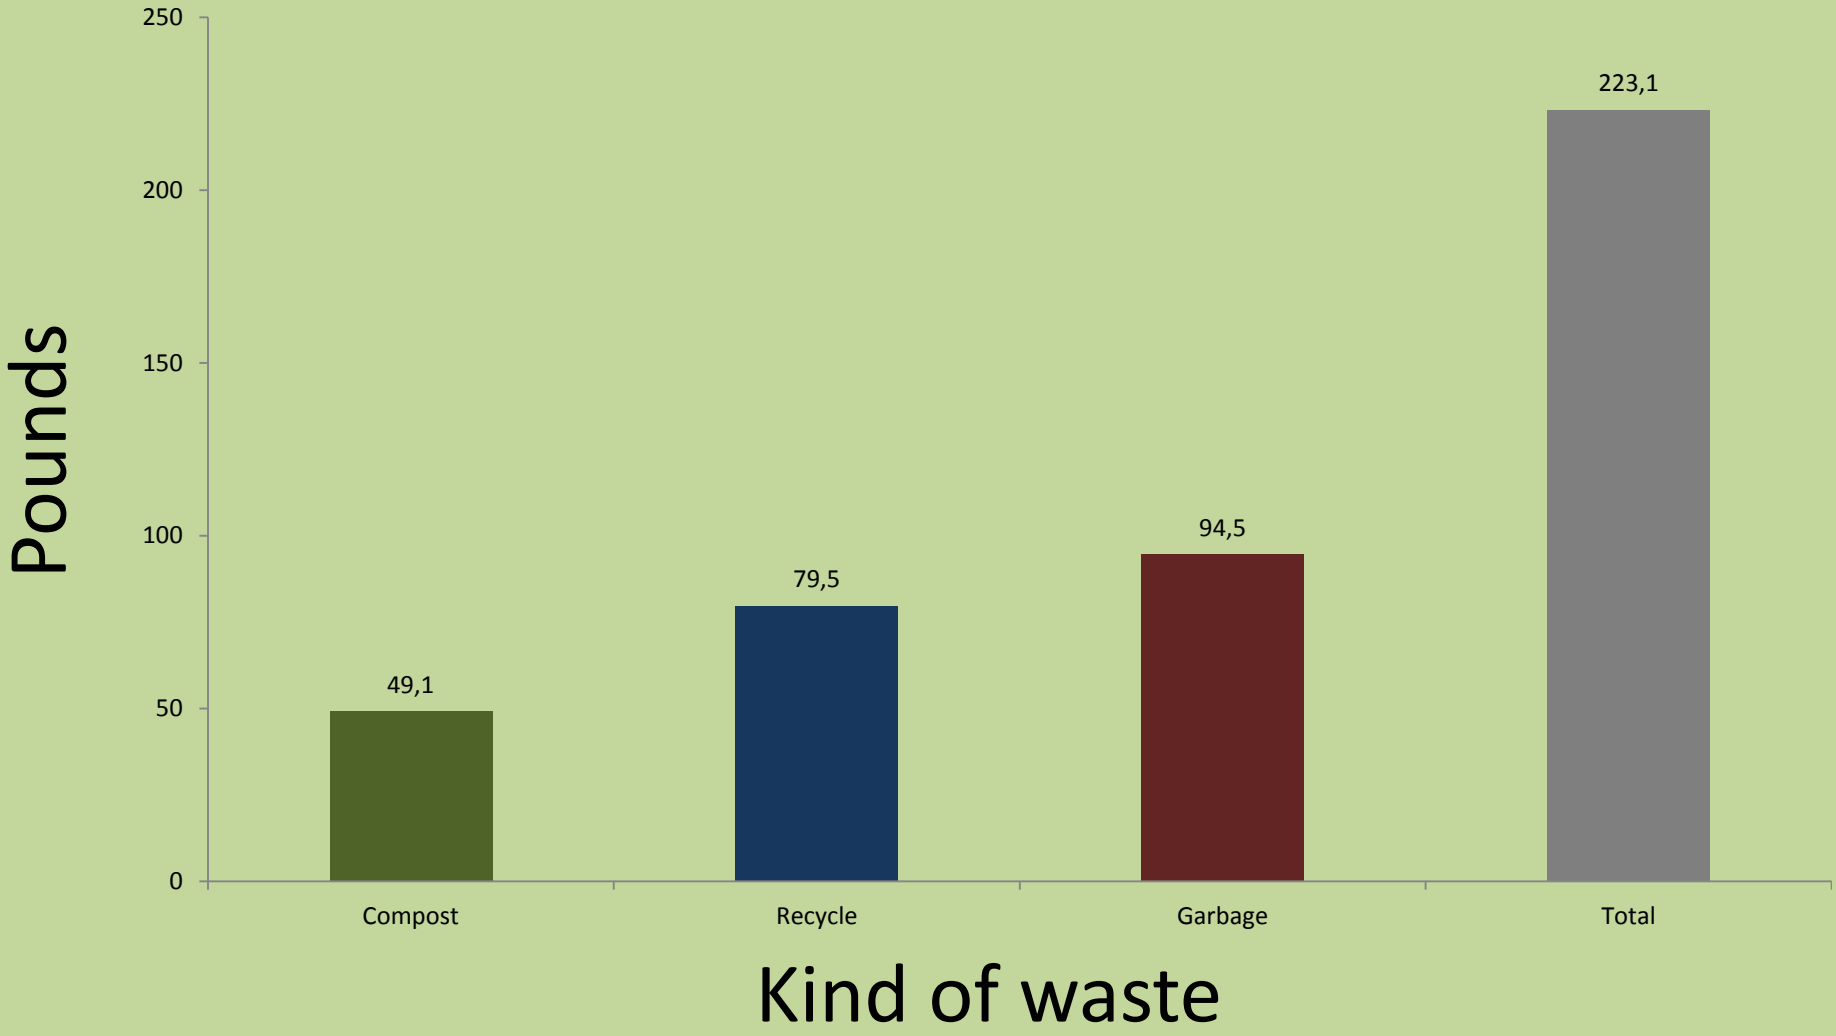
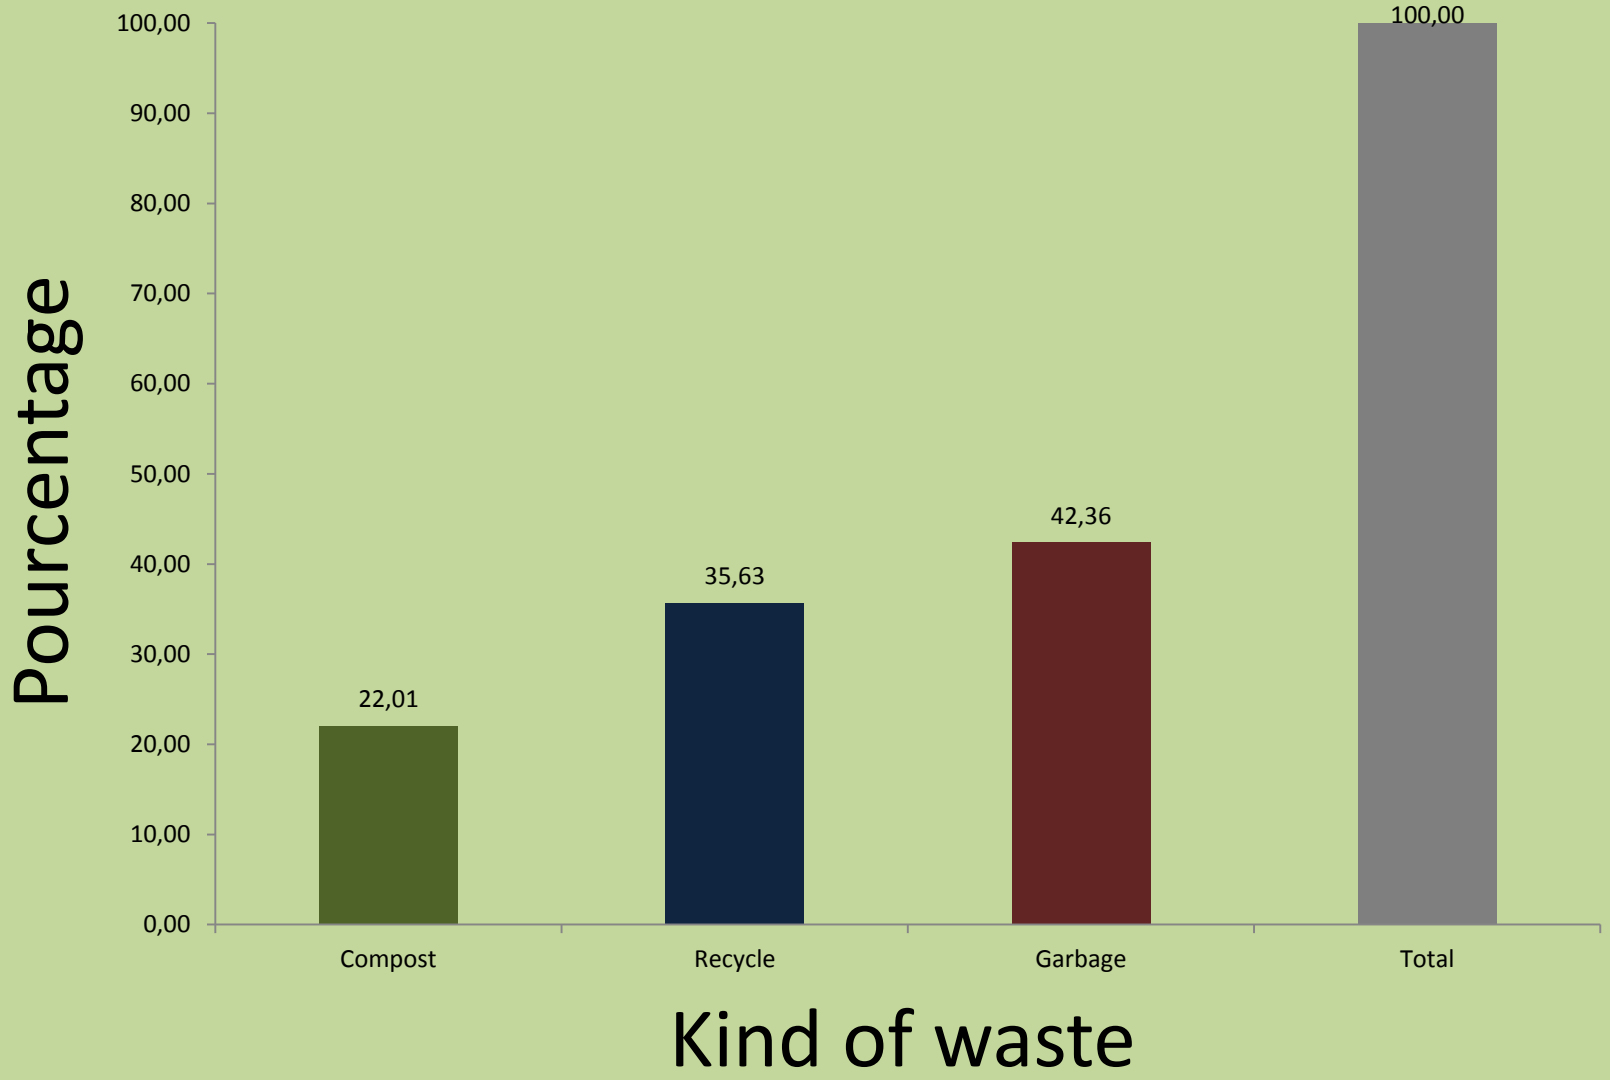
Waste produced



Waste produced



Results

- **43.12 CO_2 tons** equivalent was produced by the travelling ;
- To reduce the waste production, the participants sorted their wastes (compost and recycling) ;
- We reduced the amount of waste produced by **128.6 pounds**;
- We produced **49.1 pounds** of compost and **79.5 pounds** of recycling, compared to **94.5 pounds** of waste.
- This is a really good result meaning that more than **57.64%** of the waste produced will be reused.
- We have to plant minimum **216 trees** only for the greenhouse gases produced

Congratulations!

You made a 2 CATEGORY event!

=

We must plant 378 trees or organize a community clean up or create a green space in town!

Congratulations!

You did the difference!!! All actions are important!!!!
Thank you to CreeHealth Board who believed, participated and acted on making this event an eco-friendly one!

This event was a GREEN success and hopefully will be repeated every year and individually in your businesses!
