How to use PANBIO COVID-19 rapid antigen tests
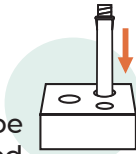

BEFORE

A **B** Blow your nose and wash your hands with soap
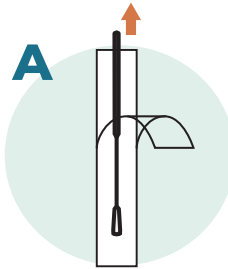

1 SET UP

Fill the tube with the test liquid **up to the first line**

Place filled test tube in the assembled test tube rack

2 COLLECTION

A Peel down and remove nasal swab

**B** Insert nasal swab up to **1 inch (2.5 cm)** from edge of nostril

1" 2.5 cm

Roll **5 times** in **each nostril** (right and left nostril)

3 PREPARATION

A x 5 Swirl the swab gently and slowly in the liquid **5 times**, pressing it against the sides of the tube
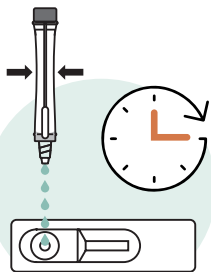

B Gently pinch the tube to extract the fluid while removing the swab

D Screw the blue cap onto tube

C Break the swab at the break-point where there is an indentation and leave the swab in the tube
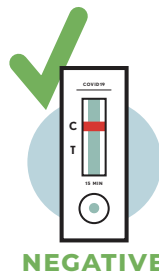

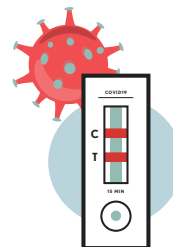

4 TESTING

Place **5 drops** in the rapid response cartridge and wait **15 minutes**, no more

** Place the test on a flat surface and do not touch it during the waiting time*

Here is an example of a positive test, negative and an invalid test

NEGATIVE

POSITIVE

INVALID

Redo the nasal swab with a new kit.

If the test result is positive: Please inform your PSO.
