Introduction to **open space** discussion

Tuesday, April 12, 2016

Strategic Regional Plan

1. SRP was developed and adopted by the CHB in 2004 for a 10-year horizon;
2. The vision of the SRP was based on the conclusions of the General Assembly held in Ouje-Bougoumou in 1999;
3. Along with the vision there were 10 practical orientations. For reference they are posted on the wall at the back of the room;
4. After 12 years, many of these orientations are implemented completely or partially. Much has been done (as examples: Improvement of the facilities 5 new CMCs, MSDCs, whole medical service plan, clinical plans for the next CMC's projects, more recently the Charter service, medevac) but much is to be done (Youth in difficulty, patient services, social services) to reach the global vision of Miyupimaatisiun;
5. After these years, CHB thinks that it is time to update the SRP. For this update, everything is on the table. It is the goal of this week Regional Health Assembly.
6. The approach is an open discussion (What is called Open Space) to generate your feedback and proposals;

Questions:

7. What, in your perspective, are the major issues that the Cree Nation is facing with regards to health and social wellness?
8. What are the top priorities in your community for the next 5 to 10 years?
 - Examples:
 - i. Youth (physical, mental and emotional health) (What is the role of family and community?)
 - ii. Chronic diseases (Diabetes, pulmonary, etc.) (Are they preventable???)
 - iii. Mental Health (Substance, suicide, etc.)

9. Among all these priorities what would be the three (3) most important ones?
10. It is always interesting to define priorities but would it be possible to **describe the expected results** that you would like to see for each of your priorities;
11. Describe how you see the CHB in 10 years?
12. What would be the contribution of the major partners in the Miyupimaatisiun journey?
 - Band Council
 - Community
 - Other Cree entities (School Board, etc.)
 - Cree Health Board
13. Could you provide clear direction on how these entities could work together (All these entities are saying that they want to work together but none provide ways to do it)?

The objective of our session is to prepare the road map of the next SRP and bring your input and **make the SRP your plan.**
